Freelance Android Developer, *Fivver*

04/2021

- ▮ Devised documentation for the app, detailing operation, functions and capabilities
- ▮ Maintained comprehensive techniques to locate bugs and errors in the application for speedy issue resolution.

Projects

Webpage

– I created a law firm webpage for my portfolio (which can be found on my GitHub repository) for this web page I used WordPress, PHP, HTML, CSS, and Elementor. I created a local server, created the design, and built a custom WordPress theme that works with Elementor.

ASP.NET Web Application

I created this web application using visual studio to showcase my skills in web development and also show employers and clients my portfolio. I used HTML and CSS for this project and it took me 2 weeks. It's a responsive one page website which has 4 sections, "About", "Services", "Portfolio" and "Contact us" section.
